SUMMARY

Software engineer building mobile and web products in Flutter, currently at Vietnam Silicon. I run AI coding agents (Claude Code) in production to lift delivery velocity while holding code quality through rigorous review, and build local-LLM tools for macOS on the side. B.Eng in Software Engineering, UIT (VNU-HCM).

EXPERIENCE

Vietnam Silicon

Dec 2025 – Present

Software Engineer · Mobile Developer · Ho Chi Minh City

Pioneered Claude Code (a CLI coding agent) for automated refactoring, feature work, and unit testing, lifting delivery velocity while holding code quality through rigorous manual review.

Ship within a 30-engineer Agile team across complex, high-performance product modules.

Architected a Flutter Web platform for a national agriculture ministry to digitize a durian export and supply-chain process, improving transparency and cutting administrative friction.

Built a cross-platform app for a national farmers' association with deep LLM integration for real-time, AI-powered agricultural guidance.

ITBee Solutions

May 2025 – Dec 2025

Mobile Developer · Ho Chi Minh City

Engineered core features across two products, focused on mobile performance and UI responsiveness.

Built a mobile app for real-time monitoring and control of an automotive manufacturer's robotic arms, prioritizing system stability and precision.

Led a sub-team: owned the Git workflow, code reviews, PR merges, and the full build cycle.

Partnered with backend and QA via Jira to harden stability and resolve complex bugs.

NPH Digital

Nov 2024 – May 2025

Software Engineer · Remote

Implemented pre-launch features for a social-networking app during late-stage development.

Advanced BLoC state management for a more responsive UI and cleaner data flow.

Integrated Agora SDK for livestreaming and Socket.io for real-time messaging.

3xp0

Oct 2023 – Oct 2024

Software Developer, Intern · Ho Chi Minh City

Built and launched a cross-platform kitchen-management app (iOS & Android) in Flutter/Dart with Riverpod.

Integrated POS systems and P2P sync for real-time order updates with minimal latency.
